

## Anatomy of a CYBER ATTACK

Wednesday, July 31

CE Session: 1:00 - 4:30 pm

Bowling Social: 4:30 - 6:30 pm

Pinstripes, Oak Brook, IL

Join us as we go play-by-play through the different phases of a cyber-attack and look at what happens in depth! This unique event is not one to miss and is structured to help you support clients as well as prepare your own agency!

We will start by talking about how people may become a target (no matter their size), and what goes into various attacks as we pick one to walk through live. Next, take a front row seat as we explore the Incident Response phase and discuss the steps needed to contain and recover from an attack. And last, we'll go deep into the claims phase to talk about what to expect and how cyber claims can be so unique compared to other lines of business.

This event will include experienced professionals that share their personal experiences with things like ethical hacking/penetration testing, incident response plan development and testing, and cyber liability claims support.

### **Presented by Ryan Smith, RLS Consulting**

Ryan's experience in cybersecurity, sales, insurance, technology, education, and mathematics has helped him become a business-oriented problem solver who can simplify complex topics. His eclectic and diverse background can now be leveraged by businesses interested in outside perspectives to help them overcome challenges.
